| <b>Duration</b>                                                                              | 1 minute 10 seconds                                    |                    |
| <b>Score</b>                                                                                 | 94 / 150                                               |                    |
| <b>Question 1:</b><br>Continuous improvement in safety is seen as everyone's responsibility. | <b>User Answer:</b><br>Neither Agree nor Disagree      | <b>Point:</b><br>3 |
| <b>Question 1 explanation :</b>                                                              | ISO 45001 10.3: Continual improvement                  |                    |
| <b>Question 2:</b><br>People help each other work safely and speak up when needed.           | <b>User Answer:</b><br>Agree                           | <b>Point:</b><br>4 |
| <b>Question 2 explanation :</b>                                                              | ISO 45001 5.4: Worker participation                    |                    |
| <b>Question 3:</b><br>Safety is fully integrated into how we conduct business.               | <b>User Answer:</b><br>Agree                           | <b>Point:</b><br>4 |
| <b>Question 3 explanation :</b>                                                              | ISO 45001 10.3: Integration and improvement            |                    |
| <b>Question 4:</b><br>Safety data and feedback drive management decisions.                   | <b>User Answer:</b><br>Neither Agree nor Disagree      | <b>Point:</b><br>3 |
| <b>Question 4 explanation :</b>                                                              | ISO 45001 9.1.1: Performance evaluation                |                    |
| <b>Question 5:</b><br>We routinely learn from both successes and failures.                   | <b>User Answer:</b><br>Strongly Disagree               | <b>Point:</b><br>1 |
| <b>Question 5 explanation :</b>                                                              | ISO 45001 10.3: Continual improvement                  |                    |
| <b>Question 6:</b><br>Teams proactively identify weak signals before incidents occur.        | <b>User Answer:</b><br>Strongly Agree                  | <b>Point:</b><br>5 |
| <b>Question 6 explanation :</b>                                                              | Hudson Maturity Model: Proactive and Generative levels |                    |
| <b>Question 7:</b><br>Employees stop work when unsafe conditions arise.                      | <b>User Answer:</b><br>Agree                           | <b>Point:</b><br>4 |

|                                                                                                  |                                                                             |                    |
|--------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------|--------------------|
| <b>Question 7 explanation :</b>                                                                  | DuPont Bradley Curve / Hudson Maturity Model                                |                    |
| <b>Question 8:</b><br>Safety performance improvements are reviewed and communicated regularly.   | <b>User Answer:</b><br>Agree                                                | <b>Point:</b><br>4 |
| <b>Question 8 explanation :</b>                                                                  | ISO 45001 10.3: Continual improvement                                       |                    |
| <b>Question 9:</b><br>Leading indicators are tracked and used to improve safety performance.     | <b>User Answer:</b><br>Neither Agree nor Disagree                           | <b>Point:</b><br>3 |
| <b>Question 9 explanation :</b>                                                                  | ISO 45001 9.1.2: Evaluation of compliance                                   |                    |
| <b>Question 10:</b><br>Corrective and preventive actions are tracked to completion.              | <b>User Answer:</b><br>Agree                                                | <b>Point:</b><br>4 |
| <b>Question 10 explanation :</b>                                                                 | ISO 45001 10.2: Corrective actions                                          |                    |
| <b>Question 11:</b><br>Incident investigations identify system weaknesses, not individual blame. | <b>User Answer:</b><br>The question was not answered.                       | <b>Point:</b><br>- |
| <b>Question 11 explanation :</b>                                                                 | ISO 45001 10.2: Incident investigation                                      |                    |
| <b>Question 12:</b><br>Safety inspections and audits focus on actual work practices.             | <b>User Answer:</b><br>Neither Agree nor Disagree                           | <b>Point:</b><br>3 |
| <b>Question 12 explanation :</b>                                                                 | ISO 45001 9.1: Monitoring, measurement, analysis and performance evaluation |                    |
| <b>Question 13:</b><br>Supervisors reinforce standards and model expected behaviors.             | <b>User Answer:</b><br>The question was not answered.                       | <b>Point:</b><br>- |
| <b>Question 13 explanation :</b>                                                                 | ISO 45001 5.1: Leadership and commitment                                    |                    |
| <b>Question 14:</b><br>Training programs are effective and refreshed regularly.                  | <b>User Answer:</b><br>Agree                                                | <b>Point:</b><br>4 |
| <b>Question 14 explanation :</b>                                                                 | ISO 45001 7.2: Competence and awareness                                     |                    |
| <b>Question 15:</b><br>All workers are competent for the tasks they perform.                     | <b>User Answer:</b><br>The question was not answered.                       | <b>Point:</b><br>- |
| <b>Question 15 explanation :</b>                                                                 | ISO 45001 7.2: Competence                                                   |                    |
| <b>Question 16:</b><br>Pre-task briefings and toolbox talks are meaningful                       | <b>User Answer:</b><br>Neither Agree nor Disagree                           | <b>Point:</b>      |

|                                                                                                     |                                                           |                    |
|-----------------------------------------------------------------------------------------------------|-----------------------------------------------------------|--------------------|
| and specific to the work.                                                                           | Neither Agree nor Disagree                                | 3                  |
| <b>Question 16 explanation :</b>                                                                    | ISO 45001 7.3: Awareness                                  |                    |
| <b>Question 17:</b><br>Contractors and subcontractors are fully integrated into the safety system.  | <b>User Answer:</b><br>Agree                              | <b>Point:</b><br>4 |
| <b>Question 17 explanation :</b>                                                                    | ISO 45001 8.1.4.2: Contractors                            |                    |
| <b>Question 18:</b><br>Safety is integrated into production and planning decisions.                 | <b>User Answer:</b><br>Neither Agree nor Disagree         | <b>Point:</b><br>3 |
| <b>Question 18 explanation :</b>                                                                    | ISO 45001 8.1: Operational planning and control           |                    |
| <b>Question 19:</b><br>Temporary deviations are controlled and approved with clear justifications.  | <b>User Answer:</b><br>Neither Agree nor Disagree         | <b>Point:</b><br>3 |
| <b>Question 19 explanation :</b>                                                                    | ISO 45001 8.1.4: Procurement and change management        |                    |
| <b>Question 20:</b><br>Changes to operations are reviewed for safety impacts before implementation. | <b>User Answer:</b><br>Agree                              | <b>Point:</b><br>4 |
| <b>Question 20 explanation :</b>                                                                    | ISO 45001 8.1.3: Management of change                     |                    |
| <b>Question 21:</b><br>Controls follow the hierarchy of controls (eliminate → PPE last).            | <b>User Answer:</b><br>Agree                              | <b>Point:</b><br>4 |
| <b>Question 21 explanation :</b>                                                                    | ISO 45001 8.1.2: Hierarchy of controls                    |                    |
| <b>Question 22:</b><br>Work tasks are planned with formal risk assessments before starting.         | <b>User Answer:</b><br>Agree                              | <b>Point:</b><br>4 |
| <b>Question 22 explanation :</b>                                                                    | ISO 45001 6.1: Actions to address risks and opportunities |                    |
| <b>Question 23:</b><br>Lessons learned are shared and acted upon across the organization.           | <b>User Answer:</b><br>Neither Agree nor Disagree         | <b>Point:</b><br>3 |
| <b>Question 23 explanation :</b>                                                                    | ISO 45001 10.3: Continual improvement                     |                    |
| <b>Question 24:</b><br>Near misses and unsafe conditions are reported promptly and without fear.    | <b>User Answer:</b><br>Neither Agree nor Disagree         | <b>Point:</b><br>3 |
| <b>Question 24 explanation :</b>                                                                    | ISO 45001 10.2: Nonconformity and corrective action       |                    |

|                                                                                                    |                                                               |                    |
|----------------------------------------------------------------------------------------------------|---------------------------------------------------------------|--------------------|
|                                                                                                    |                                                               |                    |
| <b>Question 25:</b><br>Safety information flows effectively between departments and levels.        | <b>User Answer:</b><br>Neither Agree nor Disagree             | <b>Point:</b><br>3 |
| <b>Question 25 explanation :</b>                                                                   | ISO 45001 7.4: Communication                                  |                    |
| <b>Question 26:</b><br>Employees believe they can report mistakes without fear of punishment.      | <b>User Answer:</b><br>Neither Agree nor Disagree             | <b>Point:</b><br>3 |
| <b>Question 26 explanation :</b>                                                                   | ISO 45001 5.4: Worker participation                           |                    |
| <b>Question 27:</b><br>Management prioritizes learning from incidents rather than assigning blame. | <b>User Answer:</b><br>Neither Agree nor Disagree             | <b>Point:</b><br>3 |
| <b>Question 27 explanation :</b>                                                                   | ISO 45001 10.2: Incident investigation and corrective actions |                    |
| <b>Question 28:</b><br>Supervisors actively coach and mentor safe behaviors.                       | <b>User Answer:</b><br>Agree                                  | <b>Point:</b><br>4 |
| <b>Question 28 explanation :</b>                                                                   | ISO 45001 7.2: Competence                                     |                    |
| <b>Question 29:</b><br>Leaders allocate sufficient time and resources for safety initiatives.      | <b>User Answer:</b><br>Agree                                  | <b>Point:</b><br>4 |
| <b>Question 29 explanation :</b>                                                                   | ISO 45001 5.1: Leadership involvement and resource provision  |                    |
| <b>Question 30:</b><br>Leadership visibly demonstrates commitment to safety as a core value.       | <b>User Answer:</b><br>Agree                                  | <b>Point:</b><br>4 |
| <b>Question 30 explanation :</b>                                                                   | ISO 45001 5.1: Leadership and commitment                      |                    |
