SAFETY INSPECTION TOOL

Select the appropriate inspection topic from the dropdown list to load the correct checklist for your activity. Multiple new modules will become available soon. Answer each question as **Yes**, **No**, or **N/A**. Any **No** responses will automatically open the Corrective Action panel. After saving, you can review and verify all corrective actions in the **Inspection Control Center** dashboard.

CAP-01-Q3

Where a permit-required confined space is entered, is

continuous atmospheric monitoring in place with alarms that can be heard or seen by entrants and the attendant?

Answer: YES

Inspector Comment: —

CAP-01-Q4

Have all hazardous energy sources connected to the space—such as mechanical drives, electrical feeds, process lines, and hydraulic/pneumatic systems—been isolated and verified using lockout/tagout or physical disconnection?

Answer: YES

Inspector Comment: —

CAP-01-Q5

Is ventilation—mechanical or verified natural—configured and confirmed adequate, based on testing and monitoring, to maintain a safe atmosphere for the duration of work inside the space?

Answer: YES

Inspector Comment: —

CAP-01-Q6

Is a trained attendant assigned, present at the entry point, and dedicated solely to monitoring the confined space entry and coordinating emergency response?

Answer: YES

Inspector Comment: —

CAP-01-Q7

Are safe means of entry and exit provided and kept clear so that workers can evacuate or be rescued from the space without obstruction?

Answer: YES

Inspector Comment: —

CAP-01-Q8

Has a confined space rescue plan been established, communicated, and supported by suitable retrieval equipment or rescue arrangements that can be activated without entering the space?

Answer: YES

Inspector Comment: —

CAP-01-Q9

Are all entrants trained, medically cleared where required, and authorized for confined space entry and the specific hazards identified in the space evaluation?

Answer: YES

Inspector Comment: —

CAP-01-Q10

For permit-required entries, has the confined space entry permit been fully completed, reviewed by the entry supervisor, and posted or made available at the point of entry before anyone enters?

Answer: YES

Inspector Comment: —

CSE-01-01

Confined space entry permit (if required) is issued, current, and available at the entry point.

Answer: NO

Inspector Comment: no permit

Corrective Action (CAM-Lite)

Deficiency Description: no permit

Responsible Individual: ABC

Corrective Action: developed and implemented correct permit
